server c:\users\finn\csci351\hw3\server.py

module that listens for file packets and writes to a file

Modules

random rdt socket time

Functions

main()
> main function that listens for file packets and sends acks

write_to_file(name, data)
> writes some data to file
> name: file to write to
> data: data to write in file

Data

buffer = {}
client_addr = ('127.0.0.1', 8050)
client_port = 8050
excepted_seq = 0
rcvd_packets = []
s = <socket.socket fd=448, family=2, type=2, proto=0, laddr=('127.0.0.1', 8000)>
server_port = 8000
